## Profissional Experience

### Bosch   Jan 2024 — Present
#### Senior Frontend Developer
PRO360 (One PRO Ecosystem)

PRO360 is an access portal for Bosch Professional services.
Users can register once to enjoy benefits, such as extending their tool warranty from 1 to 3 years.
I am part of one of the feature teams, which includes 3 frontend developers, myself included.
Our work focuses primarily on redesigning and enhancing existing features, while also adding new ones, in the webapp and mobile app.

React, React Native, Redux, RxJS, Jasmine

### Bosch   Nov 2022 — Jan 2024
#### Senior Frontend Developer
RefinemySite

LEAN colaboration platform.
I was part of the BIM team, one of the feature teams of this project.
This frontend team had 3 developers, including me.
I mostly worked with 3D models, using Three.js and IFC.js libraries.
This project went into maintenance mode, which is why I moved to another project.

Angular 16, NgRx, RxJS, Three.js, IFC.js, Jasmine

### KPMG (Boost IT)   Feb 2022 — Nov 2022
#### Senior Frontend Developer
KYC - New clients onboarding

Building a Know Your Customer platform, with 7 frontend developers.
I was part of the leading team, with other frontend co-worker.
Web application built with a Micro-frontends architecture, with one BFF (Backend For Frontend) for each Micro-frontend.

Angular 12, Micro-frontends, Nest.JS, Node.JS, RxJS

### KPMG (Boost IT)   Oct 2021 — Feb 2022
#### Senior Frontend Developer
AEOI - Tax reporting

Help and simplify tax reporting obligations.
Migrate the old webapp from AngularJS to Angular 12.
Lead frontend team of 4 developers.

Angular 12, AngularJS, Migration

### WOW! (Innowave)   May 2021 — Oct 2021
#### Full Stack Developer
US Telco

Develop new features for WOW! for business.
Lead frontend team of 6 developers.

React, Next.js, Node.JS, Serverless, AWS

### NOS (Innowave)   Oct 2018 — May 2021
#### Full Stack Developer
PT Telco

Develop, design and build all the layers (frontend and backend) in FCNA and SIGI (webapps to be used by NOS co-workers).
Also have been envolved in other projects, to make some more technical decisions and guide the more junior developers.

Angular 7-11, Node.JS, Express, Nest.js, Java, MongoDB, Docker, K8

### CGI   Jul 2017 — Oct 2018
#### Junior Full Stack Developer
EDSN, Netherlands

Migrate an internal management webapp from Adobe Flash into Angular 6 on the frontend and Sprint MVN framework with Java 8 on the backend.

Angular 6, Adobe Flash, Spring MVN, Java 8

## Skills

### Libraries & Frameworks
Angular, NgRx, RxJS, Next.js, React, Jasmine, Node.js, Nest.js

### Programming Languages
Typescript, Javascript, HTML5, CSS3, SASS, LESS

### Tools & Platforms
MariaDB, MongoDb, Docker, Kubernetes, AWS, Azure, Git, Visual Code

## Education

### ISCTE-IUL - University Instituite of Lisbon
Computer Science and Telecommunications Engineering
Bachelor degree

## About

Portugal, Lisbon.
I consider myself a full-stack engineer but I am currently only focused on front-end development.
I define myself being a communicative person and easy to learn about new subjects.

## Interests

Love to code.
On my free times, I like to go outside, get some fresh air, and take a break from technology.
Crossfit addicted.
Father of Afonso.
Dog owner.
